Customize with Post Printing Minimums are just 1 case!

Screen Printing

In this method a screen is used instead of a plate. Ink is pushed through a fine mesh screen to transfer the desired image to the product. It is our most versatile process because of its gentle and precise nature; and we can match any PMS ink color. Multiple colors and critical registration can be accomplished on a wide variety of products. The ink we use is cured by UV light which creates a glossy finish. A matte additive can be used to remove the gloss; or a metallic powder can be added to the ink to create a brushed metallic look. Screens must be made on every order, repeat or new as the screen is reclaimed and used again. The film used to make the screens is stored in the file to be used on future orders.

Hot Stamping

This process uses a metal plate in combination with heat, pressure & duration to transfer the foil to the surface of the product, leaving the desired impression. The plate is kept on file for future use. Foil colors can be metallic, matte, or gloss. Each foil has a different backing to adhere to different substrates. Printing colors are limited to available foil from our suppliers. If a specific PMS color is desired, screen printing is the better option. This is the only method to obtain a true metallic image. Multiple color printing can be accomplished however foil should not overlap.

Flexo Printing

A rotary system using water based ink and a flexible plate which is mounted directly onto the printing cylinder. The plate is kept on file for future use. It is our fastest post-printing process and quite economical. Product options are limited to paper finishes for ink absorption. Product with handles must be fixed like that of a twisted paper handled shopping bag. Bags with rope handles will not run well on this type of printing machine. Single color prints are best suited to this process. When printing multiple colors, registration cannot be critical due to machine variances.

Easily identify the printing method.

Follow this coding system to identify the printing method available for the products listed in this catalog. SS = Screen Printing, HS = Hot-Stamp, FL = Flexo Printing. This will be located in the far right side of the header line. The letters will appear where that method of printing is available for that item. Pricing can be found in the back of the catalog on pages 76-79.

Product Code	Size	Pkg. Wt/Pkg	1	5	10 25+
Aruba Green Tin	ted Kraft Boxes wit	h auto-lock bottoms & tuck lids, kraft interior - Made in Ca	ınada		FL HS SS
EF-GL333ARU	3" x 3" x 3"	100 5	31.72	28.15	27.46 26.77

Samples & Eaches: The "Samples Each" icon indicates products that will incur a sample charge. Use the each pricing shown on the product page for cost. Insert an "X" after the dash in the code to signify an "EACH" item. (ie. PP-ART3885 is a CASE and PP-XART3885 is an EACH.)

No Charge for PMS Standard Inks, \$10 charge for Metallic Inks and Matte inks Screen Charges (per screen/per color) for New Order = \$75, for Repeat Order = \$55

General Information for Post-Printing

Quantity Post-printing allows us to combine multiple sizes of the same style of product to accumulate toward the per thousand cost, provided one common plate & foil/ink are used. Specifically when hot-stamping, changing the plate or foil using a \$20 change fee is a good way to obtain quantity pricing. Change fees cannot be used in screen or flexo printing.

Rush Orders: All orders that must be shipped within 5 business days of proof approval may be subject to a 25% upcharge of the printing price. Air freight charges may be required for new plates.

Artwork: Camera Ready artwork is preferred. We can accept PDF, AI, or EPS files. Font must be supplied or artwork outlined. Jpeg artwork will not provide quality printing. Changes requested to be made to supplied artwork will be billed at \$60 per hour with \$15 minimum charge. We can print up to 45 line screen in Flexo and up to 100 line screen in Screen Printing. In Hot-Stamping half tones do not appear the way they do in ink. Instead a screen adds texture to the solid foil impression.

Registration: Screen Printing tolerance is 1/16" shift in any direction between colors. Hot-Stamping tolerance is 1/8" in any direction with no critical alignment. Flexo Printing tolerance is 1/2" in any direction with no critical alignment.

Coverage: Hot-Stamping & Flexo Printing cannot tolerate heavy ink coverages therefore we recommend screen printing for those applications.

Merch Bags: Merchandise bags are hot-stamped flat which creates a ghost impression on the back of the bag. To avoid this, the bags can be inserted: a \$50 for applies

inserted; a \$50 fee applies.

Restrictions: In Flexo Printing, a \$50 insert fee applies to any bag or box with an overall length measuring less than 11".
